

Why study Biology?

Are you curious? Do you think big? Do you like to make sense out of data or trends? Do you love the outdoors?

Biology is the study of life and incorporates many marketable skills daily. Of the top 25 fastest growing careers, half directly relate to Biology¹. As our society innovates, there will be huge demand for skilled workers to problem solve in medicine, the environment, nutrition, genetics, and energy. Biology offers individuals the chance to be innovative in the pursuit of answers to life's most puzzling questions.
